

RII40720 Certificate IV in Civil Construction Supervision

Specialisation I – Supervision

Are you working as a site supervisor in the civil construction industry? This qualification is designed for those leading teams, implementing operational plans, supervising civil works and managing site-based work, health and safety.

Course Overview

This qualification reflects the role of employees working in supervisory positions in civil construction, performing tasks involving a broad range of varied activities most of which are complex and non-routine. They are responsible for the safety, efficiency and quality of work of others, contribute to the development of technical solutions to non-routine problems and apply management plans to the workplace.

Delivery and Assessment

There are theory and practical training and assessment components to the course. Skills will be trained and assessed through a mixture of on-the-job and off-the-job training and assessment.

You may be able to seek recognition for your previous studies or experience. Civil Train offers Recognition of Prior Learning (RPL), Recognition of Current Competency (RCC) and Credit Transfer (CT) for this qualification.

Entry Requirements

Civil Train will conduct a Language, Literacy and Numeracy (LLN) test at the qualification level for all learners as part of the enrolment process. The LLN test will determine if any support is required to undertake this qualification. Learners who are identified as not meeting course entry requirements will be assisted with referral to appropriate support services.

Learners will be required to be employed in the civil construction industry and have a Construction White Card prior to starting training within the qualification.

Course Duration

This program is offered as an 18-month traineeship in WA under a Contract of Training. Formal training may be completed in a shorter amount of time for experienced learners.

Indicative Prices

Funded: Funding may be available through the Jobs & Skills WA, Lower Fees, Local Skills program; if students are registered through a traineeship/apprenticeship pathway.

Fees will depend on units selected and in which year the units commence. The student tuition fees are indicative only and are subject to change given individual circumstances at enrolment. Additional fees may apply such as student services and resource fees.

Unfunded: \$11,500.00

The CTF provides funding support for training of eligible workers in the construction industry. We acknowledge the support of the CTF in reducing the costs of training for eligible workers.

Contact your local super friendly consultant. They know a bucket load about training for our industry. They'll discuss training methodologies that best suit your business and they are current with the latest government incentives that may be available to your business.
